Career Objective

Motivated Computer Science and Engineering undergraduate specializing in Cyber Security at VIT Vellore, with a foundation in programming, data structures, and web technologies. Interested in full-stack development and cybersecurity, with a focus on strengthening technical skills through hands-on projects, continuous learning, and practical experience.

Education

B.Tech – Computer Science and Engineering (Cyber Security) **CGPA: 9.16**
Vellore Institute of Technology (VIT), Vellore 3rd Year

Senior Secondary (XII), Telangana Board **94.90%**
Sri Chaitanya Junior College 2024

Secondary (X), Telangana Board **92%**
Geetanjali Olympiad School 2022

Technical Skills

Programming Languages: C, C++, Java, Python, TypeScript
Frameworks & Libraries: React, FastAPI, Express.js
Cybersecurity & Networking: Network Security, Wireshark
Web Development: HTML, CSS, JavaScript
Databases: PostgreSQL, MongoDB, MySQL
Tools & Others: Git, GitHub, Docker, Linux

Experience

Full Stack Developer Intern **Jun 2026 – Jul 2026**
Copter Code, Chennai, India **GitHub**

- Architected a full-stack Learning Management System (LMS) using React, TypeScript, Node.js, and PostgreSQL/Prisma, with 20+ data models.
- Engineered a real-time virtual classroom using LiveKit WebRTC, supporting video streaming, screen sharing, role-based permissions, and a collaborative whiteboard.
- Integrated an AI tutor with multi-turn conversational context and automated multi-model fallback to support step-by-step STEM tutoring.

Projects

Network Traffic Analysis for Anomaly Detection **GitHub**

- Built a packet-ingestion pipeline using native binary parsing and Scapy to extract 14 structural DNS metrics, including Shannon entropy and label depth, while preventing data leakage from domain memorization.
- Developed an asynchronous FastAPI and React 18 dashboard with Tailwind CSS, JWT-based role access control, model-drift telemetry, threat visualizations, and a 38-test Pytest suite.

Play Horizon – Arcade Suite **GitHub**

- Developed a buildless React single-page arcade platform featuring Sudoku, Neon Snake, and QuizMaster using a modular component architecture.
- Implemented HTML5 Canvas game mechanics, collision detection, game loops, dynamic scoring, and responsive keyboard and touch controls.

CAMFIX **GitHub**

- Developed a campus issue-resolution application with role-specific dashboards for students, technicians, and administrators, interactive multi-floor facility maps, and QR-code asset scanning.
- Implemented a modular Node.js/Express REST API with PostgreSQL integration across 13 relational tables and indexed lookups.

Certifications & Achievements

- **Microsoft Certified: Azure Administrator (AZ-104)** – Certificate
- **AWS Academy Graduate – Cloud Foundations** – Certificate
- **IEEE Information Theory Society (ITS) Chapter – Technical Coordinator**
