Dear Student,

As per the curriculum requirements, students are expected to earn their internship credits by completing a minimum of 28 days of training in a domain-specific industry.

However, it is recognized that some students may not have the opportunity to undertake the internship in an industry. In such cases, an alternative pathway has been provided, allowing students to earn the required credits by registering and successfully completing an approved certification course.

The following guidelines pertain to the certification courses offered and the Internship Credit eligibility criteria. Please note that pursuing a certification is entirely optional.

Credit Eligibility:
Only the professional proctored certification examination will be considered for summer internship credit.
Course completion certificates will not be accepted under any circumstances.

Course Selection & Preference:
Students may take up to two courses; however, only one proctored certification examination will be considered for internship credit. The second course, if chosen, may be pursued for skilling or personal development purposes.
Any course failing to meet the minimum threshold of 50 selections will be discontinued.

Training and Payment:
Upon commencement of the course, students will have one week to complete the payment. Within this period, students may switch to another course or certification. Once the payment is made, the student is required to continue with that particular certification. Students may attend the one-week training session and proceed with payment upon satisfaction.
