CAREER OBJECTIVE

Motivated Computer Science student with a strong foundation in programming, data structures and web technologies. Seeking opportunities to apply my technical skills, learn from industry experts and contribute to impactful projects while growing as a software developer, with a focus on backend development, data engineering and cybersecurity.

EXPERIENCE

Full Stack Developer Intern | Copter Code - Chennai, IN Jun 2026 - Jul 2026

- Built and optimized a scalable **Learning Management System (LMS) with backend services and database integration**, enabling efficient course, assignment, quiz and student-progress management while **supporting large-scale data operations**.
- Implemented **JWT authentication and role-based access control (RBAC)** for Student, Teacher and Admin roles.
- Developed **quiz, assignment, progress tracking and real-time classroom features** using React, TypeScript, PostgreSQL and **LiveKit WebRTC**.
- Integrated **Prisma ORM** with PostgreSQL for structured database management and efficient data access.

PROJECTS

Network Traffic Analysis for Anomaly Detection

- Developed a **DNS traffic anomaly detection system** to identify suspicious and potentially **malicious network activity from PCAP/PCAPNG captures**.
- Implemented a prediction pipeline using **Random Forest, Isolation Forest and rule-based DNS analysis** to classify traffic and generate risk scores.
- Extracted and **analyzed 14 DNS traffic features using Python and Pandas**, with **Wireshark for packet capture and traffic inspection.**

Tech Stack: Python, Pandas, Scikit-learn, FastAPI, React, PostgreSQL, Wireshark

Play Horizon - Arcade Suite

- **Developed a buildless React-based single-page arcade** platform featuring Sudoku, Neon Snake and QuizMaster with modular component architecture.
- Implemented HTML5 Canvas game mechanics, real-time collision detection, game loops**, dynamic scoring and responsive keyboard/touch controls.**
- Built client-side routing and localStorage-based persistent leaderboards, with a **responsive glassmorphism UI** and GitHub Pages CI/CD deployment.
- Implemented **HTML5 Canvas** game mechanics with real-time collision detection, frame-based rendering, and keyboard controls.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES	FRAMEWORKS & LIBRARIES	CYBERSECURITY & NETWORKING
C, C++, Java, Python, TypeScript	React, FastAPI, Express.js, Pandas	Network Security, Wireshark
WEB DEVELOPMENT	**DATABASES**	**TOOLS & OTHERS**
HTML, CSS, JavaScript	PostgreSQL, MongoDB, MySQL	Git, GitHub, Docker, Linux

EDUCATION

BTECH - Computer Science and Engineering (Cyber Security)
VIT Vellore | 3rd Year | **CGPA: 9.16**

Senior Secondary (XII), Telangana Board — 94.90% | 2024

Secondary (X), Telangana Board — 92% | 2022

LANGUAGES

• English • Hindi • Telugu
